Lightweight and Long Lasting FRP Bridge Decking

Speaker: **Scott Reeve**
Composite Advantage

Program: Fiber Reinforced Polymer (FRP) structures offer lightweight, corrosion resistant, long lasting decks for vehicle and pedestrian bridges. FRP provides a lightweight solution for movable bridges and truss bridges. Features such as wear surface, crown, curbs, scuppers and railing connections can all be incorporated in the delivered deck. As prefabricated elements, FRP decking contributes to accelerated construction. The presentation will include a background/overview of FRP material, discussions on both pedestrian and vehicle bridge deck applications, and a discussion on how FRP composites connect and co-exist with traditional bridge materials.

Location: Sterle's Country House, 1401 E 55th St, Cleveland, OH 44103

Lunch: (Served family style) Hand-pounded, pan-fried veal schnitzel with home-style potatoes, chicken paprikash served over dumplings, steamed vegetables, garden salad, coffee/tea/soda, and dessert.
