

Position Title: Senior Bridge Engineer/Project Manager

Position Status: Full-Time

Our Strongsville (Cleveland area) Ohio office is looking for an experienced Bridge Engineer/Project Manager. The candidate will be a self-motivated individual who likes being part of a team providing structural engineering support primarily for transportation improvement projects. Design and evaluation of structures from bridges to retaining walls are part of workload.

Minimum Requirements:

- Bachelor's Degree in Civil Engineering Required
- 6 Years of Bridge Engineering Experience Minimum
- PE in the State of Ohio
- ODOT Certification in Design and Inspection
- Project Management Experience
- Experience with Structural Engineering Design Software

The preferred candidate will have a strong structural engineering background, a Master's Degree in Structural Engineering, experience in bridge inspection and load ratings, working knowledge of Microstation and AutoCAD, and experience with preparing structural engineering design drawings for ODOT and local government clients. The ability to visit project sites, meet with potential clients, make comprehensive evaluations of proposed work, and develop technical proposals for potential projects is required.

Salary negotiated based on years of service, expertise/capabilities, and specific project experience.
